EDUCATION

**MA Creative Writing (Fiction)**  
Distinction · Royal Holloway, UoL · 2022–2023

**BA American Lit & Creative Writing**  
First Class · Royal Holloway, UoL · 2018–2021

SKILLS & TOOLS

**Content operations**  
Content refresh pipelines, multi-format tracking systems, editorial calendars, process design, enablement & handover documentation.

**SEO & GEO/AEO**  
Keyword & content-gap research, pillar-and-cluster architecture, LLM citation optimisation, schema, content audits.

**Brand & editorial**  
Tone of voice, messaging frameworks, editorial governance, brand standards, long-form writing, thought leadership.

**Data & performance**  
AI visibility scorecards, data storytelling, A/B testing, competitor analysis, GA4, GSC, Looker.

**Vendor & agency management**  
Platform evaluation & procurement, POC design, and managing web dev, SEO, video and AI-platform partners.

**Platforms**  
WordPress, HubSpot, SEMrush, AirOps, Google Search Console, Riverside, CapCut, Canva, Adobe Suite, Notion.

INTERESTS

Fiction writing and reading across literary fiction and contemporary essays, with a long-standing interest in history, literature, and sociology. Volunteer with Second Chance, supporting academic scholarships for high-achieving students from low-income backgrounds.

Raisa Ahmed  
CONTENT OPERATIONS MANAGER

Profile

B2B SaaS content operations manager who owns the content function end to end, from strategy and systems through to writing, publishing, and measurement. In my first five months of AI visibility tracking I grew YOOBIC's brand AI citation rate from **7.95% to 27.39%**, structuring content so engines cite it as the source. I author the tone-of-voice frameworks that keep output consistent, build the pipelines and tracking systems that keep it running, and led the evaluation and procurement of our AI content platform. A one-person content function comfortable managing freelancers, agencies, and AI-powered workflows.

Work Experience

**Content Operations Manager YOOBIC · B2B SaaS, AI frontline retail operations** 2025–Present  
*A one-person content function, absorbed and rebuilt after the demand generation lead left. Scope spanning strategy, systems, editorial, SEO/GEO, social, podcast, and sales enablement.*

- SEO, GEO & content strategy**
- Grew YOOBIC's brand AI citation rate from 7.95% to 27.39% across the first five months of tracking, structuring content so ChatGPT, Perplexity, Gemini, and Google AI Mode cite it as the source.
  - Work a "defend and attack" prioritisation model: protecting pages that already hold AI visibility while targeting topics with high citation rates but low brand mention.
  - Grew a retail training platforms comparison page from 70 to 301 cited prompts in seven weeks, with citation volume on the page up over 700%; grew a retail operations software comparison page from 135 to 357 cited prompts, with citations up over 280%.
  - Own SEO and content strategy end to end on a pillar-and-cluster architecture across retail task management, store visits, and audits.

- AI platform evaluation & content operations**
- Led the end-to-end evaluation and selection of an AI content operations platform: running vendor demos, building the comparison framework, and negotiating commercial terms including a proof-of-concept opt-out.
  - Defined the POC success criteria and KPI framework at CFO request, and pushed back on unrealistic pipeline expectations for a 60-day window.
  - Built and reported an AI visibility scorecard to CMO and CFO level, tracking citation rate, mention rate, first-mention rate, and share of voice against named competitors across a defined content cohort.
  - Audited vendor-built campaign logic and identified defects in exclusion rules, scoring criteria, and competitor data attribution before they affected output.
  - Designed an eleven-step content refresh pipeline from AirOps into WordPress staging, and trained my manager to run it independently; built a multi-format content tracking system (blog, podcast, webinars, case studies, press, reports) with taxonomy for funnel stage, audience, and repurposing.

- Brand, tone of voice & messaging**
- Tone of Voice Lead on the 2025 Brand Refinement programme: authored YOOBIC's first company-wide Tone of Voice Guidelines and co-authored the Brand Messaging Cheat Sheet, and led editorial standards covering US English style, accessibility, inclusive language, and naming.
  - Central point of contact for tone and messaging, partnering with marketing, product, and sales leadership and external agency Superside; partnered on product messaging during the V14 development cycle.

- Editorial, social, podcast & enablement**
- Write long-form pillar articles (2,500 to 4,000+ words) for senior retail operators, turning research into data-led, commercially framed narratives; produce branded case studies and a hand-built HTML industry page.
  - Led LinkedIn content strategy and produce the biweekly Frontline Fridays podcast end to end (Riverside, YouTube, WordPress, guest outreach); manage a Notion content calendar with owner assignment across the wider marketing team.
  - Create persona-segmented sales outreach and account-specific copy for enterprise targets; built the RTS 2026 content programme and made the internal business case for AI-assisted production.
